

Is there a new or existing apparatus, structure, protective element, or process being installed or modified in your facility? If you answered yes, you may be required by law to conduct a PRE-START HEALTH & SAFETY REVIEW (PHSR).

Remember.....Ontario Occupational Health & Safety Act (OSHA) Section 25(2) requires that an employer shall:

“(h) take every precaution reasonable in the circumstances for the protection of the worker.”

Ask yourself these questions:

- Are you an owner, lessee or employer that is installing or modifying a piece of equipment or process within your facility?
- Did you know, that you are required by law to conduct a PHSR prior to the operation or use of said apparatus or structure?
- Are you aware of the applicable provisions of the regulations that outline what circumstances dictate the requirements of a PHSR?
- Do you know under what circumstances a PHSR exemption would be applicable?
- Are you aware a PHSR should be conducted by a P. Eng?
- Are you aware that in the case of a workplace accident, liability can be extended to the persons responsible for the health & safety of their employees?
- If subjected to a Ministry Of Labour Inspection, could you provide evidence of your due-diligence?

Solutions PMG Can Help You Address These Concerns

871 Victoria St. N. Suite 203, Kitchener ON Canada N2B 3S4
 Tel: (519) 576-7728 Fax: (519) 576-0873

Pre-Start Health & Safety Review

Components Of A PHSR

Solutions PMG Inc. will provide a timely professional review that identifies potential hazards to employees in the workplace. It further details the action required to bring the apparatus, construction or modification into compliance with Section 7 of the Regulation for Industrial Establishments. Our professional PHSR program will include the following:

- Data collection to permit a hazard analysis review
- Submit a Scope of Work report detailing reviews and associated activities
- Examine drawings, specifications, manufacturers data, codes and standards related to the specific process or equipment
- Evaluate industry standards & report on cost feasibility
- Ensure PHSR reports meet the Professional Engineers of Ontario Guidelines

Industries We Serve

Solutions PMG Inc. has extensive experience in many diverse industries. This diverse process engineering experience allows us to offer a broad understanding of processes and equipment installation. Our areas of expertise are the following:

- Food Processing
- Meat Slaughtering
- Cement & Aggregates
- Waste Treatment
- Air Pollution
- Automotive Industry
